

REMARKS

By means of the present amendment, the specification has been amended to include a claim of priority.

In Claim 23, the recitation of the term "method" is believed to be a typographical error since the claim is directed to a "computer program product". The term "method" has been replaced with "computer program product" to accurately reflect the nature of the claim. Claim 23 has been amended only to correct this typographical error. For this reason, applicants are entitled to a full scope of protection, including any judicially created doctrines such as the Doctrine of Equivalents.

In view of the foregoing amendments and remarks, Applicant respectfully requests favorable reconsideration and early passage to issue of the present application.

Respectfully submitted,

By *Yan Glickberg*
